

Energy and Carbon Policy

Trainline's Energy and Carbon Policy

Our Business

Trainline is the leading independent rail and coach travel platform selling rail and coach tickets to millions of travellers worldwide, enabling them to seamlessly search, book and manage their journeys all in one place via its highly rated website and mobile app. Our purpose is to empower greener travel choices, connecting people and places.

Policy Vision

Trainline's carbon and energy policy is intended to support Trainline's purpose and guide Trainline's business activities to ensure we limit the impact of our operations on the environment.

Rail offers travellers a greener alternative to flying or driving, creating 86% less CO₂ emissions than air travel and 70% less CO₂ emissions compared with car travel, per passenger. It can move millions of people quickly and cleanly, for leisure or business, across countries and continents.

We believe we have a key role to play in supporting the rail industry, businesses, and governments in meeting their emissions targets. Our cross-functional sustainability team is dedicated to encouraging modal shift; promoting rail as a more sustainable way to travel; and reducing the impact on the climate from our own operations.

Energy and Carbon Commitments

Trainline is committed to:

- setting net-zero targets that align with the Science-Based Targets initiative ("SBTi") by FY2024 and reducing emissions from our operations in line with 1.5°C and from our value chain (Scope 3) in line with the Well-Below 2°C scenario;
- monitoring our energy usage and carbon emissions;
- considering opportunities to improve energy efficiency and increase the use of renewable and lower carbon intense energy sources to reduce our carbon emissions;
- disclosing energy consumption from activities which we own or control and the greenhouse gas emissions from our full emissions footprint;
- expecting our suppliers to minimise their carbon emissions;
- supporting efforts toward energy efficiency and carbon reduction including the UN Sustainable Development Goals and the Task Force on Climate-Related Financial Disclosures ("TCFD");

- complying with all relevant energy and carbon laws and regulations applicable to the jurisdictions within which Trainline operates; and
- educating employees to understand what steps they can take to reduce their and Trainline's energy use and carbon emissions.
